Summary

Full Stack Web Developer with 2+ years of experience in coding and infrastructure management. Proven track record in developing campus-scale applications and managing Kubernetes-based server environments. Passionate about Web Security and API Pentesting.

Education

Universitas Darussalam Gontor

Computer Science

https://unida.gontor.ac.id

S.Kom.

Ponorogo • Expected 2027

Experience

LPTSI UNIDA Gontor

Full Stack Developer

System Administrator

Ponorogo

June 2025 - Present

August 2025 - Present

- Managed and maintained campus-wide Kubernetes clusters, ensuring 99.9% uptime for critical services.
- Developed and deployed "Seranah" (Digital Archive System) using TypeScript stack.
- Automated server provisioning and monitoring using Terraform and Grafana.
- Developed "Seranah" (Digital Archive & Correspondence System) using TypeScript, Express, Prisma, MySQL.
- Created optimized RESTful APIs using Express and Bun.
- Implemented secure authentication and authorization using PASETO Token and using OAuth2 for centralized authentication.

KSL Dragon (Linux Study Club)

Main Instructor

Ponorogo

July 2025 - February 2026

- Mentored members in Linux system administration and ethical hacking basics.
- Designed hands-on modules for web application security and CTF-style challenges.

Projects

Seranah (Digital Archive System)

- Built a high-performance archive system for university correspondence.
- Optimized query performance and implemented secure authentication.

https://seranah.unida.gontor.ac.id

Dermasight

- A skin disease detection system for dermatologists.
- Implemented machine learning models for skin disease classification.

Skills

</> Python

Advanced
python, programming, automation, flask, web scraping

🔗 CI / CD (Github Actions)

Proficient
continuous integration, automated testing, automated workflows, github workflows

</> React

Intermediate
responsive web, dashboard, frontend

</> Typescript / Javascript

Advanced
typescript, javascript, web programming, frontend, backend, react, express, bun

🐳 Docker

Proficient
containerization, docker, docker compose

</> PHP

Intermediate
php, server side programming, yii, laravel

</> Express

Advanced
express, backend

🏠 Kubernetes

Intermediate
kubernetes, containerization, container orchestration

</> Golang

Beginner
golang, high performance, golang fiber, backend system

Certifications

Certified Ethical Hacker (CEH)

EC-Council
