https://linkedin.com/in/m-faridh-maulana

Summary

Currently a Backend Engineer and Servers Administrator with 2+ years of experience in coding and infrastructure management. Proven track record in developing campus-scale applications and managing Kubernetes-based server environments. Passionate about Web Security and API Pentesting.

Education

April 2024 – Present

Computer Science

Universitas Darussalam Gontor · S.Kom. · Ponorogo

Experience

August 2026 – Present

AI Full-Stack Developer Cohort

Asah led by Dicoding (Supported by GoTo) · Remote

Participating in an intensive tech cohort program led by Dicoding and supported by GoTo. Mastering end-to-end web application development from front-end to back-end, integrating AI capabilities into web apps, prompt engineering, and building industry-standard capstone projects.

October 2025 – Present

Server Administrator

LPTSI - UNIDA Gontor · Ponorogo

Managing production-grade servers, Administrating the network and access, ensuring system security, and overseeing IT infrastructure for smooth operations

February 2026 – July 2026

Full-Stack Developer Cohort

Coding Camp powered by DBS Foundation · Remote

Learning and applying skills in web development, including HTML, CSS, JavaScript, React, Node.js, Express.js, and PostgreSQL. Participating in group projects and working on real-world projects.

August 2025 – Present

Backend Engineer

LPTSI - UNIDA Gontor · Ponorogo

Developing a high-performance backend application to supporting various frontend and while also ensuring high-availability, maintainability, and scalability

December 2024 – Present

Full-Stack Developer

LPTSI - UNIDA Gontor · Ponorogo

Developing and maintaining critical web applications, ensuring high performance and scalability. Collaborating with cross-functional teams to deliver exceptional user experiences.

August 2024 – December 2024

Penetration Tester

LPTSI - UNIDA Gontor · Ponorogo

Conducting penetration tests to identify vulnerabilities in web applications and APIs, ensuring the security of the system, and providing feedback to improve security measures.

Projects

October 2025 – Present

Seranah (Digital Archive System)

An archives and letter management system, built for University of Darussalam Gontor

June 2026 – June 2026

Dermasight

A skin disease detection system that can detect skin diseases such as acne, psoriasis, melanoma, and eczema while providing deep analysis about the lesion, prevention, and severity scoring.

August 2024 – Present

SIAKAD - UNIDA Gontor

An Integrated Academic Information System, built for University of Darussalam Gontor

August 2024 – Present

SIMPEG - UNIDA Gontor

An Integrated Academic Lecture Information System, built for University of Darussalam Gontor

December 2025 – January 2026

Green Waste Vision

A Smart Waste Classification System, built with Machine Learning Model integrated with a Web Application

September 2026 – September 2026

Intention AI

Intent-driven content strategy engine powered by Real-Time Google SERP RAG and Gemini 3.6 Flash.

Skills

Python
Advanced
python, programming, automation, flask, web scraping

Typescript / Javascript
Advanced
typescript, javascript, web programming, frontend, backend, react, express, bun

Express
Advanced
express, backend, REST, API

CI / CD (Github Actions)
Proficient
continuous integration, automated testing, automated workflows, github workflows

Docker
Proficient
containerization, docker, docker compose

Kubernetes
Intermediate
kubernetes, containerization, container orchestration

React
Intermediate
responsive web, dashboard, frontend

PHP
Intermediate
php, server side programming, yii, yii2

Golang
Intermediate
golang, high performance, golang fiber, backend system

Problem Solving
Advanced
problem solving, critical thinking

Team Work
Proficient
team work, agile, time management

System Design
Proficient
system design, erd, infra, system architecture

Leadership
Proficient
leadership, team leader, project manager

Certifications

October 2024

Certified Ethical Hacker (CEH)
EC-Council

January 2025

Certified Network Security Practitioner (CNSP)
The SecOps Group

February 2026

Certified Social Engineering Defense Practitioner (CSEDP)
The SecOps Group

Languages

Indonesia
Native

English
Fluent

Arabic
Intermediate

Interests

Web Development
web development, full stack development, frontend, backend

Cyber Security
penetration testing, web application security, security testing, secure coding, SSDLC, vulnerability assessment, red teaming, capture the flag, hacking

Infrastructure Management
devops, dev-ops engineer, dev ops, infra management, devsecops, server management
